- Developed an automation framework for data ingestion and data warehousing tools.
- Designed and implemented a monitoring system for big data environments.
- Projects:**
  - Big Data Automation frameworks** (Python, Scala, Spark, Kafka)
    - Developed and maintained big data automation frameworks to validate ETL process changes.
    - Managed and supported a proprietary data warehouse system.
  - Master Monitoring Service** (Python, Prometheus, Java, Graphana)
    - Developed a monitoring service that utilizes daemon programs to track the status of running processes on deployed servers and pushes the data to Prometheus Gateway.
    - Integrated with Grafana to periodically fetch the data from Prometheus, generating visualizations and setting up alerts for potential issues.

Aug 2018 - Sep 2019Software Engineer Trainee, Incedo Inc.Pune

- Contributed to cybersecurity projects leveraging Python, Django, AWS, and JavaScript.
- Projects:**
  - Cloud Management Assessor (CMA)** (Python, Django, AWS, Microservice, Git)
    - Contributed as a Python developer to a security compliance plugin used for monitoring an organization's cloud infrastructure.
    - The plugin scans system configurations via API endpoints, assesses security levels, and provides recommendations for enhancing security.
  - Common Messaging Service** (Python, Django, AWS, Microservice, Git)
    - Contributed as a Python developer to a Django-based microservice application designed for sharing information between microservices and stakeholders.
